DETAILED ACTION

This office action is in response to the amendment filed July 23, 2005. In accordance with the amendments, claims 1-33 have been canceled, and new claims 34-60 have been added. Claims 34-60 are pending. It is noted that an Examiner's Amendment accompanies this office action. In the Examiner's Amendment, claim 56 is amended, while claims 58-60 are formally canceled.

Drawings

1. The drawings were received on July 23, 2005. These drawings are acknowledged.

Allowable Subject Matter

2. Claims 34-57 are allowed. The following is an examiner's statement of reasons for allowance: the relevant prior art of record does not teach or reasonably suggest a *specific method* of manufacturing (independent claims 34, 36, 56, and 57) in which the *unnecessary parts are removed by* the uncured layers or layers having low adhesive properties (old claims 3, 4 -> new method claims 34, 36). The prior art of record does not teach or reasonably suggest a *specific method* of manufacturing in that after a groove is formed by the removal of the unnecessary material, that a *filter is inserted in this groove* (old claims 10 and 20 -> new method claims 56 and 57). The closest prior art of record (Okubora et al. US 2004/0047539 A1) teaches each of the claim limitations, but does not teach or reasonably suggest the amended claim limitations. Please see non-final rejection mailed March 23, 2005, in which this allowable subject material had been indicated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
